

DESCRIPTION — The SN54LS/74LS385 is a general-purpose adder/subtractor which is useful as a companion part to the SN54LS/74LS384 two's-complement multiplier. The LS385 contains four independent adder/subtractor elements with common clock and clear.

Each of four independent sum (Σ) outputs reflects the respective A and B input and is controlled by the S/\bar{A} pin.

When low, the clear input asynchronously resets the sum flip-flop low and the carry flip-flop either high in the subtract mode or low in the add mode. The clock is positive-edge triggered and controls the sum and carry flip-flops.

- FOUR SYNCHRONOUS ELEMENTS IN A SINGLE 20-PIN PACKAGE
- INDEPENDENT TWO'S-COMPLEMENT ADDITION/SUBTRACTION
- BUFFERED CLOCK AND DIRECT CLEAR INPUTS
